Systems & Control Letters 21 (1993) 511–512
North-Holland

Author Index Volume 21 (1993)

(The issue number is given in front of page numbers)

Abou-Kandil, H., G. Freiling and **G. Jank,** Necessary conditions for constant solutions of coupled Riccati equations in Nash games (4) 295–306
Ailon, A. and **R. Ortega,** An observer-based set-point controller for robot manipulators with flexible joints (4) 329–335
Aliev, F.A. and **V.B. Larin,** Generalized Lyapunov equation and factorization of matrix polynomials (6) 485–491
Atkins, R. and **W.F. Shadwick,** Invariant functions of control-linear systems (5) 389–395

Bamieh, B. and **M. Dahleh,** On robust stability with structured time-invariant purturbations (2) 103–108
Başar, T., see G. Didinsky (6) 433–441
Barbu, V., H_∞-control for semilinear systems in Hilbert spaces (1) 65– 72
Bartolini, G. and **T. Zolezzi,** Behavior of variable-structure control systems near the sliding manifold (1) 43– 48
Bélanger, P.R., see G.F. Wredenhagen (4) 285–287
Berghuis, H. and **H. Nijmeijer,** Global regulation of robots using only position measurements (4) 289–293
Bernhard, P., see G. Didinsky (6) 433–441
Bernstein, D.S., W.M. Haddad, D.C. Hyland and **F. Tyan,** Maximum-entropy-type Lyapunov functions for robust stability and performance analysis (1) 73– 87
Bonnet, C., An L_∞-convergent method to reduce frequency-weighted infinite-dimensional discrete-time systems (6) 443–450
Byrnes, C.I., W. Lin and **B.K. Ghosh,** Stabilization of discrete-time nonlinear systems by smooth state feedback (3) 255–263

Čelikovský, S., On the stabilization of the homogeneous bilinear systems (6) 503–510
Chang, F.-R., see H.-C. Chen (5) 405–411
Chang, F.-R., see C.-H. Fang (2) 109–114
Chen, H.-C. and **F.-R. Chang,** Chained eigenstructure assignment for constant-ratio proportional and derivative (CRPD) control law in controllable singular systems (5) 405–411
Chen, S.-L., see J.-S. Liu (5) 371–379
Chengwu, Y., see Z. Yun (2) 173–180
Chien, C.-J. and **L.-C. Fu,** An adaptive variable structure control for a class of nonlinear systems (1) 49– 57
Corless, M. and **E.P. Ryan,** Adaptive control of a class of nonlinearly perturbed linear systems of relative degree two (1) 59– 64

Dahleh, M., see B. Bamieh (2) 103–108
Dan-jie Pan, Zheng-zhi Han and **Zhong-jun Zhang,** Bounded-input–bounded-output stabilization of nonlinear systems using state detectors (3) 189–198
Didinsky, G., T. Başar and **P. Bernhard,** Structural properties of minimax controllers for a class of differential games arising in nonlinear H^∞ control (6) 433–441
Ding, Z., Change detection based on initial state estimation (4) 337–345

El Bouthouri, A. and **A.J. Pritchard,** A Riccati equation approach to maximizing the stability radius of a linear system by state feedback under structured stochastic Lipschitzian purturbations (6) 475–484

Fallot, P. and **A. Le Breton,** On the stochastic linear regulator problem for systems with infinite variance (5) 423–429
Fang, C.-H. and **F.-R. Chang,** Analysis of stability robustness for generalized state-space systems with structured perturbations (2) 109–114
Ferrante, A., G. Michaletzky and **M. Pavon,** Parametrization of all minimal square spectral factors (3) 249–254
Florchinger, P., Zakai equation of nonlinear filtering with unbounded coefficients. The case of dependent noises (5) 413–422
Freiling, G., see H. Abou-Kandil (4) 295–306
Fu, L.-C., see C.-J. Chien (1) 49– 57
